EPOS

EPOS Meeting Room Solutions
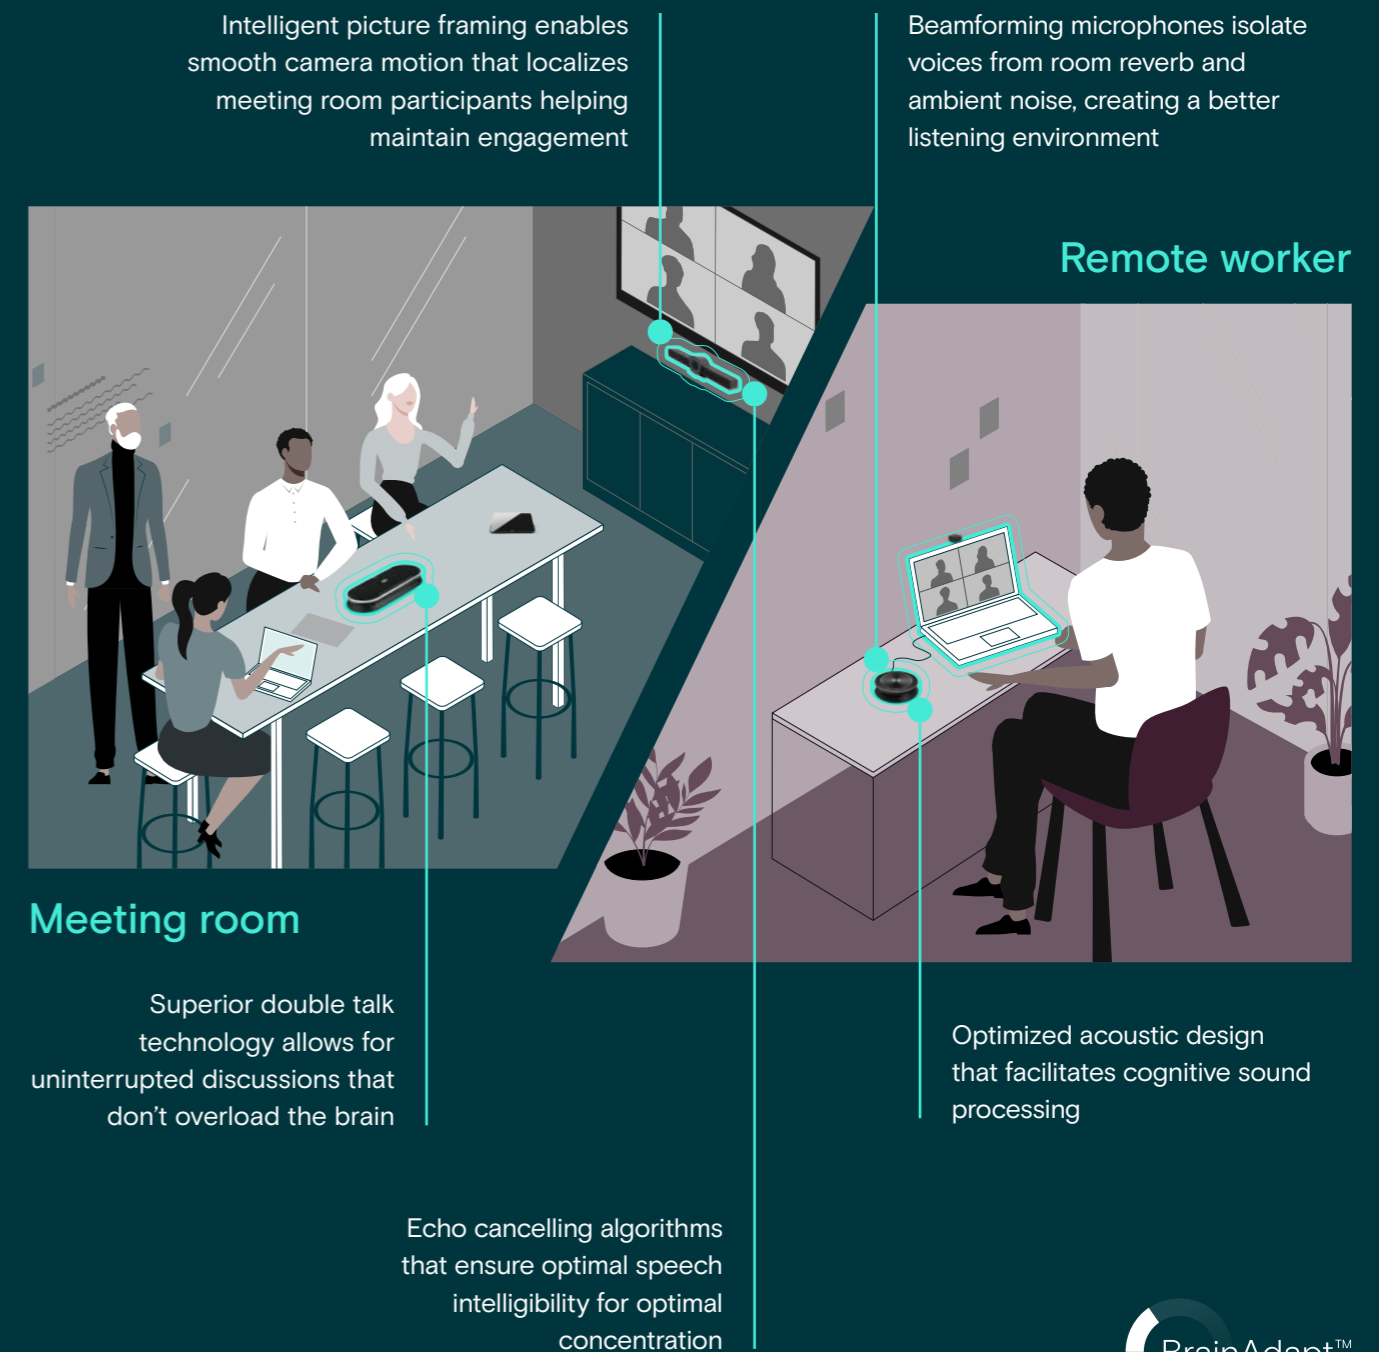

Stay Focused with Audio Designed for the Brain

Digital communication tools are now a natural part of our daily lives. But our brains can struggle to process the sounds coming from headsets and speakers, as well as noises in the background. Such sound environments can result in cognitive overload, leading to concentration loss, tiredness, and stress.

At EPOS, we understand that we hear with our ears, but we listen with our brain. So to perform at our best, we need to help the brain adapt to sound environments in the hybrid workplace. A great audio experience only happens when technologies support the brain's natural listening process, helping it to perform as intended.

That is why we design audio and video solutions built on EPOS BrainAdapt™ technology – audio designed for your brain.

EPOS BrainAdapt™ in Meeting Room Solutions

Intelligent picture framing enables smooth camera motion that localizes meeting room participants helping maintain engagement

Beamforming microphones isolate voices from room reverb and ambient noise, creating a better listening environment

Remote worker

Meeting room

Superior double talk technology allows for uninterrupted discussions that don't overload the brain

Optimized acoustic design that facilitates cognitive sound processing

Echo cancelling algorithms that ensure optimal speech intelligibility for optimal concentration

BrainAdapt™

Building on Scientific Heritage

EPOS is part of the Demant Group, a world-leading hearing healthcare and technology group, and as such builds on more than 115 years of experience of working with innovation and sound.

Based on decades of psychoacoustic research through the Demant Group, EPOS has the data on how and when the brain performs best - and designs algorithms and acoustics that make it easier for the brain to balance and adapt to artificial sound environments.

EPOS Digital Solutions

Empower Your Business Anywhere

Save valuable time and make life simpler and smarter for your IT department, your business and your colleagues. By keeping you in touch with all your EPOS devices, EPOS Manager puts you in control of your company's UC environment in three key areas:

Asset Management
Get the overview
See all your devices on the dashboard; from headsets to speakerphones and even non-EPOS devices. All users are registered in the system, which shows both active and inactive devices – who is using which device and how they are being used. Simply reallocate redundant resources to boost productivity. Reports on usage and firmware compliance keep you in complete control of company assets.

Update Management
**Less downtime, more convenience**
A flexible and cost-effective way to get the latest firmware updates to all your organization's EPOS devices, whenever it's convenient for you and your end-users. Push new updates to an unlimited number of devices across your organization from one simple dashboard. Schedule your automated updates to cause minimum downtime and disruption to your company's workflow.

Configuration Management
Easy for you, easy for end-users
The centralized configuration option allows all settings to be controlled from the IT department, ensuring that headset user's experience a simple plug and play solution. You can centrally push configurations or lock specific specifications on EPOS devices to comply with regulatory compliance settings for specific groups or individuals.

EPOS Manager
for IT Administrators

EPOS Manager has been developed for companies with a need to control their UC environment in a fast and secure way. By installing the client application, EPOS Connect, on your end users' PCs, you gain a complete overview of all deployed devices and access to new updates and settings.

For companies with several locations, it's possible to manage, update and control settings for all end-users in the entire organization. For improved security, all communication and data are encrypted and no sensitive data is stored.

The resulting simplification of the asset, update and configuration management gives great savings in both time and money.

EPOS Connect
for Headset and Webcam Users

EPOS Connect is the client application running in the background on the headset or video user's PC. The solution ensures that EPOS work seamlessly with various leading softphones and give you access to the latest firmware updates and personalized settings.

EPOS Connect is uniquely configured to either work together with a signed-up company account on EPOS Manager or as a stand-alone application for smaller companies or personal use.

Designed to be simple to use, the application allows EPOS headset, video and speakerphone users to enhance and personalize their experience and productivity simply and quickly.

THE POWER OF AUDIO
