

MEET ANYWHERE 2.1

JABRA PANACAST 20 + JABRA SPEAK2 55 MS

DATASHEET

PANACAST 20

Engineered for intelligent AI-enabled personal video conferencing

Personal video. Reinvented.

Experience the next generation of intelligent, secure, portable video collaboration with Jabra PanaCast 20. This premium personal video conferencing device utilizes cutting-edge technology to deliver an experience that's intelligent, powerful, and completely unique; PanaCast 20 is personal video conferencing, completely reinvented.

Picture perfect. Wherever you work.

Our innovative technology uses advanced processors, powerful on-board AI and a premium 13-megapixel camera to deliver a real-time 4K Ultra-HD image that's sharp and crystal-clear, with virtually no latency. So you can start that big presentation knowing you (and whatever you're presenting) will look your best.

Are you ready for your close-up?

Being seen clearly makes all the difference. Our intuitive AI-driven Intelligent Zoom automatically follows your movements, perfectly framing you, whatever you're doing. Using a powerful on-board AI processor, Intelligent Zoom intuitively adjusts your picture in real time, ensuring you're always in the center of the frame, so you don't have to stay rooted to the spot.

Lightyears ahead.

With PanaCast 20, almost any light is good light. Intelligent Lighting Optimization analyzes your environment, and automatically adjusts your image in real time, to enhance the video quality, including in rooms where the light is poorly distributed.

Two streams are better than one.

Our unique Picture-in-Picture mode uses powerful Edge AI processing to combine two real-time video streams into one, displaying the second stream in an integrated window within your main image. Picture-in-Picture mode works with any UC platform, even if they don't support dual-stream devices, helping you to make your presentations more impactful.

Collaborate in confidence.

Worried about security when working remotely? With PanaCast 20, you don't need to be. This intelligent personal camera is engineered for data security. A powerful Edge AI processor drives all of the intelligent features of PanaCast 20, which means everything happens on the device itself. This reduces the risk of a data breach, so you can get on with whatever you're doing, without worrying.

Share what's good. Hide what's not.

We can't all be camera-ready all the time. Thankfully, PanaCast 20 features an integrated privacy cover, to give you total control. Simply slide the intuitive cover across your camera lens when you need privacy, and slide it back when you're ready to turn your video on.

When you are on video calls, On-device Background Effects ensures your privacy is still protected. It enables you to replace your background with a solid color or blur it out completely, so what's behind you stays safely hidden from video participants. And because powerful Edge AI processes everything on-device, no data gets stored anywhere, so your actual background is also safe from potential cyber attacks.

Seamless UC connectivity.

PanaCast 20 works with all leading UC platforms so you can connect easily, whatever platform or systems you're using.

Engineered for the future.

PanaCast 20 will receive regular software updates¹ throughout the product's lifespan to enhance the experience, update the feature set, and ensure you continue to get the most from your investment.

Partner with Jabra audio solutions.

PanaCast 20 works seamlessly with Jabra professional-grade audio solutions. Choose from our industry leading range of headsets and speakerphones including Jabra Evolve2 65 and Speak 750.

HOW TO CONNECT - SIMPLE SETUP. INSTANT MEETINGS.

PanaCast 20 is plug-and-play. Simply plug the cable into your computer, fix the camera to the top of your laptop screen or monitor using the clip, and you're good to go – wherever you're working.

SPEAK2 55

Next-generation flexible speakerphone with outstanding professional audio

Technology for life's new rhythm

FULL DUPLEX AUDIO

The Speak2 Range is our first to be engineered with advanced full duplex audio, preserving the natural ebb and flow of real face-to-face interactions by allowing everyone to speak and be heard at the same time. Which means more natural conversations, and less stilted, jumpy audio. Great audio goes both ways.

MICROPHONE TECHNOLOGY

Voices are important in meetings, background noise, not so much. That's why Speak2 55 has four cutting-edge beamforming microphones (more than ever before) with state-of-the-art noise cancellation technology. They pick up sound from all directions and expertly filter out background noise. So you never miss a word.

VOICE LEVEL NORMALIZATION

People are at their most brilliant when they can be themselves. Speak2 55 uses our cutting-edge Voice Level Normalization technology to automatically equalize all voices to the same volume level, so people can speak in the way that comes naturally to them. No need to fiddle with the volume control.

OUTSTANDING AUDIO QUALITY

Our full-range 50mm speaker with wideband audio captures and delivers sound across a wide range of frequencies, so you can enjoy big, powerful sound wherever you work best, whether that's in the office, at home, or somewhere else. Go big and go home.

CERTIFICATIONS

Speak2 55 is certified for all leading virtual meeting platforms, which means it optimizes the whole experience and delivers professional call quality every time. So whether you prefer Microsoft Teams, Google Meet, Zoom, or another platform, you can rely on seamless plug-and-play connectivity and reliably brilliant meetings. Right from the get go.

DESIGN

We've given the iconic, much-loved 'puck' shape a makeover, with sleek new detailing, and a premium fabric cover. And it's small and durable enough to chuck in a bag, so you can take it with you wherever you go. Looks great, performs even better.

DURABILITY

Hybrid working might take you and your speakerphone to some unusual places, so we've given it a hybrid makeover. IP64-rated* protection from dust and water, and a smart protective pouch mean you can use it everywhere without worrying. Even if your hybrid week takes you to a different place every day.

EASE OF USE & BATTERY

Just plug-and-play and you're off faster than you can say "could you just repeat that?" And for those of you who like choice, we've got options. Use the USB cable for a direct line, or go wireless with up to 12 hours of battery life. Ready... set... go.

FUTURE-PROOF

With half the team on USB C, and the other half still using USB A, the struggle to find tech that suits everyone is real. Cut out the hunt for adapters with Speak2 55. Because it's the first in its class to have both connectors on the same cable (just like the rest of Speak2) it'll work for everyone, now and in the future. You can keep it in tip-top condition with regular firmware upgrades on Jabra Xpress and Direct software, too. Tomorrow, we're ready for ya.

SUSTAINABILITY

We consider sustainability carefully at every stage of product development. The casing of Speak2 55 is made with over 50% sustainable materials**, and has a number of built-in parts that can be repaired or replaced. Better sustainability = longer speaker life = great calls for you and your team for years to come.

MS TEAMS & UC VARIANTS

*Avoid exposing the USB cable or adapter plug to moisture or liquids and never charge or power up if the USB cable or adapter plug is wet or moist

**Sustainable materials include post-consumer recycled, post-industrial recycled or bio-based materials

HOW TO USE

①		Power on/off
②		Smart button / Microsoft Teams button (MS variant)
③		Answer call
④		Bluetooth
⑤		Volume down
⑥		Mute microphone
⑦		Volume up
⑧		Battery
⑨		End/reject call
⑩		Status LED ring

HOW TO CONNECT

Connect the Jabra Speak2 55 USB cable to any available USB C or A port on your computer. The LED ring will light up white to indicate the speakerphone is connected and powered on.

USB C and USB A connectors included

FEATURES

BENEFITS

Connectivity	USB cable	Plug-and-play connectivity to your computer with built-in USB C and USB A connectors
